

**Circular 16: Guidance to Custom Built exhibitors for on-site usage of electricity <NEW>**

- For electricity supply you have ordered from HKTDC, exhibitors must have their own electrician. **The official contractor will not provide installation and connection services for these items.**
- Total power consumption shall not exceed the current specified. In case of overload, the organiser reserves the right to suspend the electricity supply until the problem is rectified by the exhibitor concerned.
- In compliance with the Electricity Ordinance (Chapter 406) Electricity (Wiring) Regulations, all electrical installations, inspection and testing must be carried out by a registered electrical worker together with a registered electrical contractor. "Certification of installation, inspection & testing" (Form WR1) should be submitted to the **Official Electrical Contractor by 1500 hrs** on the last move-in day. Failing to provide by 2200 hrs on the last move-in day will result in suspension of electricity supply throughout the fair period. The employer of the electrician shall be liable for any damages caused if the electrician fails to comply with the above requirements.
- It is important that custom built exhibitor should take full responsibility of **turning off main switch of the booth after fair closes every day.** For safety and energy-saving purposes, the respective contractor will be asked to come back to the fair ground for turning off main switch if it is found still on in the empty booth. The organiser will not be responsible for any loss subsequently caused by turning off the booth main switch if the responsible contractor is not accessible.
